Assistant Technology Software Available

Text to Speech software: **OpenBook**

Text to Speech software: **ReadPlease** (will read any text you see on your screen. This can be from your web browser, email, word processor, spreadsheet or any program that displays text.)

Speech to Text software: **Dragon Naturally Speaking** (using a microphone headset you make talk into the microphone and the computer will write the text for you.)

**AudioText books available from Learning Ally** (formally named Recordings for the Blind & Dyslexic). To qualify for audio books from Learning Ally a person would need to have a documented disability and register with Haskell’s Disability Support Services.
