
Effective: January 1, 2003

Revised:

USB 705-25-00 Computer Center Acquisitions Approval Authority

Purpose

To provide for a more secure and stable network and computer environment for all offices on the Haskell Campus.

Source

Computer Center

Applicability

To all grant writers, grant managers and all Haskell departments who use, will use or recommend for purchase computers or network devices that will be serviced by the Haskell Computer Center, or access the Haskell campus network and/or the Internet through the Haskell network infrastructure

Policy

With the proliferation of new and continuing grants, it is in the best interests of Haskell Indian Nations University to adopt a policy that allows the Haskell Computer Center oversight and approval authority on all technology purchases. This oversight authority would allow recommendations against and prevent the purchase of equipment that lack or have excess software, hardware, and may or may not meet the security requirements to prevent unauthorized access to the Haskell Campus computer network. This new policy will allow the Haskell Computer Center to review and make recommendations for equipment that will be compatible with existing and future networks.

Cross-Reference

None

Approval

Dr. Karen Gayton Swisher, President
